1 General remarks

CellworXs™ is an Excel add-in. The current version 3.x is designed to run under Excel 97 or later versions.

The add-in is multi-user installation enabled. User specific information is held in the “CellworXs[UserName].ini” file, which is generated automatically in the directory of the add-in installation. The user ini file contains the individual preferred user settings. It needs to be assured that the user has “write” rights to the add-in installation directory.

Once installed, CellworXs™ will operate with its full functionality.

CellworXs™ can be installed on CITRIX environments.

2 How to install the CellworXs™ add-in

To install CellworXs™, copy the add-in to your desired directory.

For Excel 2003 or earlier versions, use the CellworXs.xla add-in file. For Excel 2007 or later versions, use the CellworXs.xlam add-in file.

For multi-user installations, the add-in file is copied to a directory on a shared drive. Assure that users have write rights to that directory, as the user specific “CellworXsUserName.ini” files will be stored in that directory.

You can now either launch CellworXs™ through:

- double clicking the file in Windows Explorer
- or point in Excel's menu Tools/Addins...

The first time a user opens the CellworXs™ add-in, the user need to accept the license agreement. This agreement can also be found at www.cellworXs.com.

2.1 Installing by file double click in the Windows Explorer

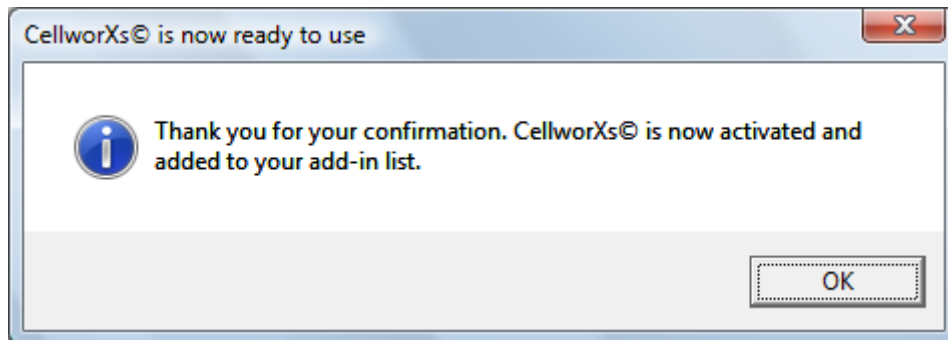

When you double click the CellworXs™ add-in in the Windows Explorer you might get a security warning similar to the one below:

Confirm the above dialog with “Enable Macros”.

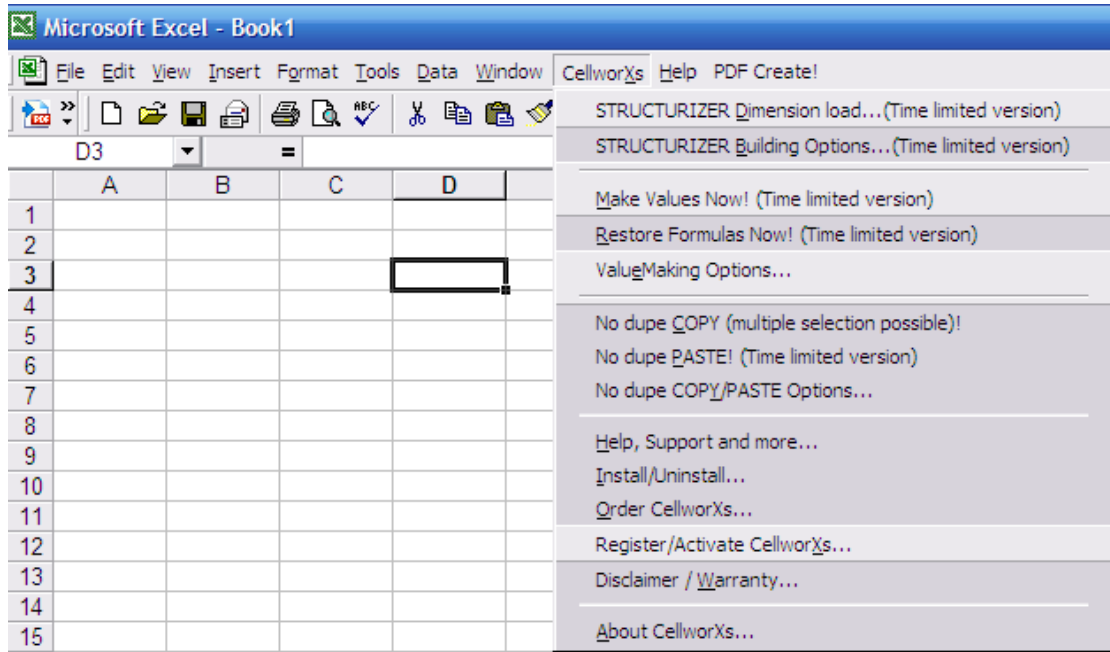

You will then be pointed that the next screen is to revisit the CellworXs™ license agreement. Click OK to see the agreement.

Read through the pages of the license agreement and confirm the tick box and click “Install”. You will then get a confirmation that CellworXs™ is now activated and added to your add-in list:

CellworXs™ will now be automatically loaded each time you launch Excel and appear in your menu bar (Excel 2003 or earlier versions) or in the ribbon (Excel 2007 onward)

CellworXs™ – Installation Guide

Excel 2003 or earlier versions

Excel 2007 or later

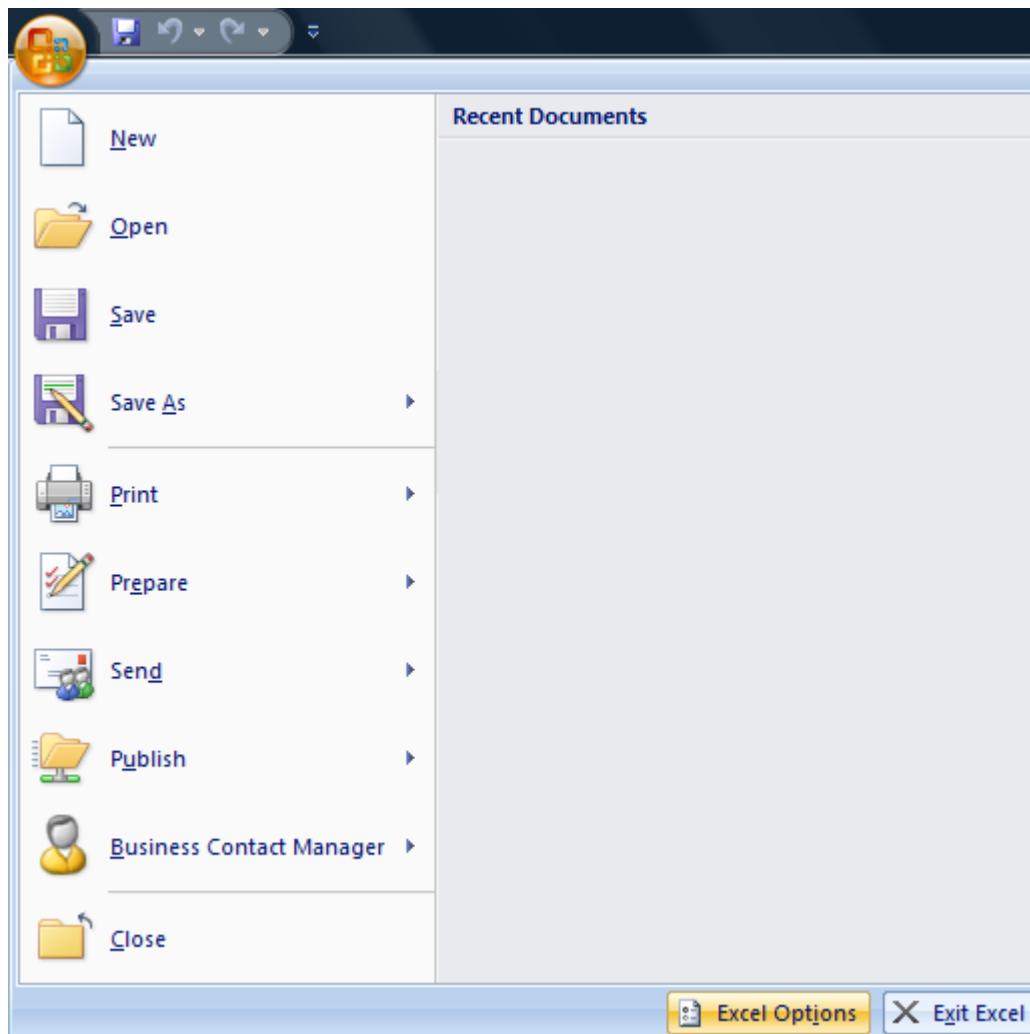

2.2 Installing CellworXs™ through Excel's add-in menu

You can also install the add-in through Excel's add-in menu. To launch the add-in menu you need to do the following:

For Excel 2003 and earlier versions:

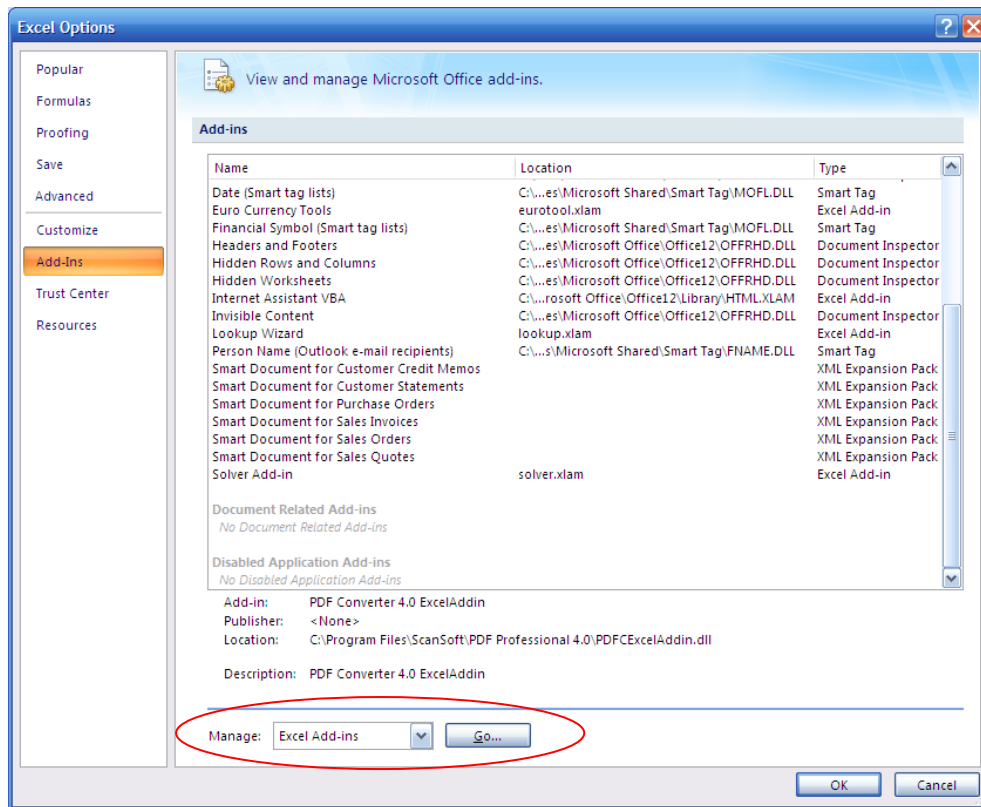

For Excel 2007 or later, select Excel Options:

CellworXs™ – Installation Guide

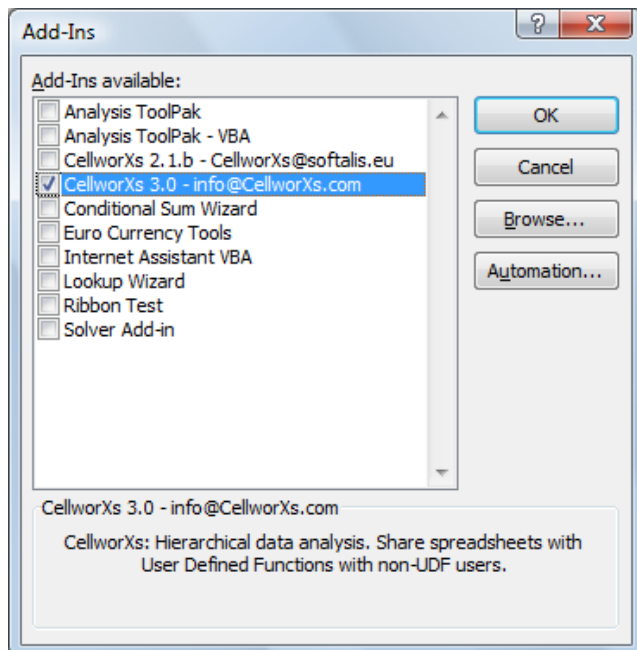

And then select the “Add-ins” option as per the next screen:

Click the “Go...” button next to manage “Excel Add-Ins”.

For all Excel Versions

In the “Add-ins available” dialog, you will now need to “Browse...” to point to the CellworXs.xla or CellworXs.xlam file:

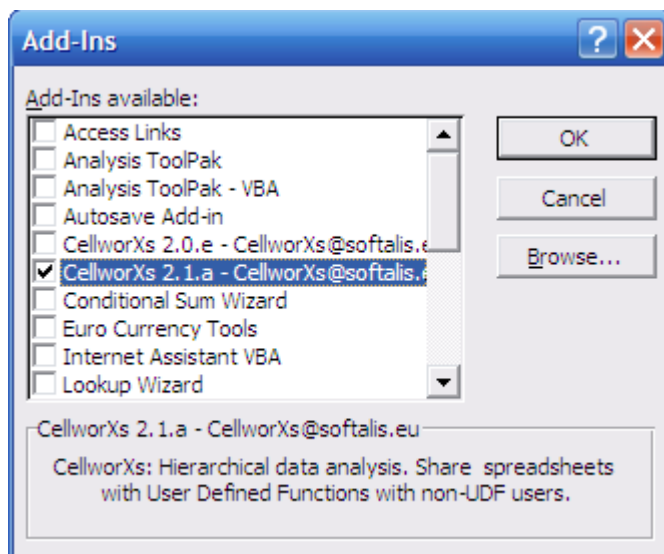

CellworXs™ – Installation Guide

Point to the CellworXs.xla or CellworXs.xlam file in the “Browse” screen:

Select the file and click “OK”. CellworXs™ will now appear in your available add-ins list. Make sure CellworXs™ is checked in the available add-ins list.

CellworXs™ will now automatically load each time you start Excel and as well remember your individual CellworXs™ user preferences.
